linkedin.com/in/sourasish-ghosh07 | github.com/SourasishG

Summary

Front-End Developer and final-year Computer Science and Engineering undergraduate with hands-on experience building responsive React applications, integrating REST APIs, and deploying projects. Familiar with Node.js, MongoDB, Python, and AWS fundamentals, with a strong interest in growing into full-stack development. AI-first problem solver who uses AI tools to accelerate debugging, research, prototyping, and implementation while applying independent reasoning to technical decisions.

Education

Sister Nivedita University *2023 – 2027*

B.Tech in Computer Science and Engineering CGPA: 8.08

Aditya Academy Senior Secondary (CBSE)

Class XII: 80% (2023) | Class X: 86% (2021)

Work Experience

AWS DevOps Intern | Employability.life *November 2025 – January 2026 (Remote)*

- Successfully completed the XPro Project: AWS DevOps Initiative, gaining practical exposure to fundamental AWS and DevOps concepts.
- Developed an understanding of CI/CD workflows, cloud infrastructure, application deployment, and AWS services such as EC2 and S3.
- Gained hands-on familiarity with DevOps practices and the role of cloud services in deploying and managing web applications.

Skills

Languages: Python, JavaScript, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express

Database: MySQL, MongoDB, PostgreSQL

Cloud & DevOps: AWS (EC2, S3), CI/CD

Tools: Git, GitHub, Supabase, Postman

Projects

MUZO – Web Audio Discovery Platform *Sep 2026* Live Demo | GitHub Repo

React, Vite, JavaScript (ES6+), Zustand, HTML5 Audio API, Plain CSS, REST APIs, Vercel

- Engineered a provider-agnostic audio engine using native HTML5 Audio and Zustand state slices, delivering real-time scrub-seeking, volume ramping, and cross-session queue persistence via localStorage.
- Integrated public music catalog APIs with AbortController request cancellation to eliminate search race conditions, establishing automated fallback endpoints for uninterrupted global streaming.
- Built a custom 3D Neumorphic design system with zero external UI libraries, featuring responsive layout containment and an automated text-measurement marquee for overflowing track titles.

Office Aid – AI-Powered Office Automation Platform *May 2026 – Present* | GitHub Repo

React 19, Vite, Tailwind CSS, Framer Motion, Axios

- Built an enterprise office platform featuring a custom Apple Liquid Glass Design System (visionOS-inspired dark UI with dynamic blur and 120 FPS spring animations).
- Developed a scalable architecture with a persistent layout shell and modular components.
- Delivered 6 core modules: Executive Dashboard (weather/KPIs/AI prompts), Project Portfolios, Agile Kanban Tasks, Meeting Timelines, Executive Profiles, and an Employee Directory with advanced filters, side-drawers, and React Hook Form workflows.

Certifications

- **AWS DevOps Initiative – Employability.life** (Jan 2026) | Credential ID: XPro27566969
- **Introduction to Generative AI – Google Cloud** (Feb 2025) | Credential ID: 03ISU86UC5K4 | Coursera
- **Generative AI: Introduction and Applications – IBM** (Feb 2025) | Credential ID: AZ1QO9FKWWB0 | Coursera
- **Introduction to Large Language Models – Google Cloud** (May 2025) | Credential ID: 7QAB657M7FS4 | Coursera
